

The Original Allergy Emergency Kit™ 20 Unit Inhaler Cabinet for School Nurses Offices

Organizing and storing asthma inhalers is difficult when space is tight! This large cabinet is intended to be installed on the wall of the school nurse's office and easily holds 20 well organized Inhalers or a combination of inhalers, chambers and spacers. This cabinet locks securely but can be accessed in an emergency by breaking the safety glass material with an attached hammer. Kit includes hammer/chain, installation anchors, evacuation tote bag, 3D signage to mount above the cabinet and both clear and privacy glass options.

- When paired with the Epinephrine Storage Cabinet, you have a great side-by-side system for organizing your epinephrine auto injectors and asthma inhalers.
- This cabinet includes the Photo Labeling System for convenient asthma inhaler "photo" sleeves and MS Word template for child photo and asthma information. Sleeves are included for all commonly available sizes of inhalers, chambers and spacers.
- A Velcro loop back panel provides maximum storage space and no worries if the designs or brands of the inhalers and other supplies change over time.
- In an evacuation scenario the back panel with all inhalers can be removed and placed in the included bright red tote bag for easy carrying.

Dimensions: 17" x 26" x 6"
